controllers information relating to the second~~at least one~~ corporate entity; and

funds information relating to the second~~at least one~~ corporate entity.

25. (currently amended) A computer-readable medium according to Claim 22, the process steps further comprising:

a step to receive instructions to generate a document including document information relating to the ~~at least one~~second corporate entity;

a step to determine the document information;

a step to generate the document; and

a step to present the document to the user.

26. (currently amended) A computer-readable medium according to Claim 22, the process steps further comprising:

a step to receive instructions to edit the determined information;

a step to determine whether the user is authorized to edit the determined information; and

a step to edit the determined information if it is determined that the user is authorized to edit the determined information.

27. (currently amended) A computer-readable medium according to Claim 26, the process steps further comprising:

a step to associate information identifying the user with the edited information.

28. (currently amended) A computer-readable medium according to Claim 26, the process steps further comprising:

a step to present an indication that the determined information is in the process of being edited.

29. (currently amended) A computer-readable medium according to Claim 22, the process steps further comprising:

a step to associate information identifying a date on which the information was edited with the edited information.

30. (currently amended) A computer-readable medium according to Claim 22, the process steps further comprising:

a step to receive a request for an image of a document relating to the ~~at least one~~ second corporate entity; and

a step to present the image to the user.

31. (currently amended) An apparatus to manage corporate entities, comprising:

a processor; and

a storage device in communication with said processor and storing instructions adapted to be executed by said processor to:

present a plurality of selectable corporate entities and a plurality of selectable elements, wherein a first one of the plurality of corporate entities is organizationally upstream or organizationally downstream from a second one of the plurality of entities

and is graphically presented as being organizationally upstream or organizationally downstream from the second one of the plurality of ~~and an entity selection area allowing selection of at least one corporate entity from a plurality of corporate entities;~~

receive a selection of the ~~at least one~~ second corporate entity;

receive a selection of one of the plurality of selectable elements;

determine information corresponding to the one selected element and relating to the selected second ~~associated with the at least one corporate entity and the one selectable element;~~ and

present the determined information to a user.

32. (newly added) An apparatus according to Claim 31, wherein the determined information comprises one or more of:

information relating to a formation of the second corporate entity;

a location of corporate documents relating to the second corporate entity;

contact information relating to the second corporate entity;

ownership information relating to the second corporate entity;

information relating to regulators of the second corporate entity;

information relating to officers of the second corporate entity;

information relating to jurisdictions in which the second corporate entity is qualified to do business;

information relating to reports filed or to be filed on behalf of the second corporate entity;

controllers information relating to the second corporate entity; and

funds information relating to the second corporate entity.

33. (newly added) An apparatus according to Claim 31, the instructions further adapted to be executed by said processor to:

receive instructions to generate a document including document information relating to the second corporate entity;

determine the document information;

generate the document; and

present the document to the user.

34. (newly added) An apparatus according to Claim 31, the instructions further adapted to be executed by said processor to:

receive instructions to edit the determined information;

determine whether the user is authorized to edit the determined information; and

edit the determined information if it is determined that the user is authorized to edit the determined information.

35. (newly added) An apparatus according to Claim 34, the instructions further adapted to be executed by said processor to:

associate information identifying the user with the edited information.

36. (newly added) An apparatus according to Claim 34, the instructions further adapted to be executed by said processor to:

present an indication that the determined information is in the process of being edited.

37. (newly added) An apparatus according to Claim 31, the instructions further adapted to be executed by said processor to:

receive a request for an image of a document relating to the second corporate entity; and

present the image to the user.
